

FMS B Core Curriculum

The following are topics that should be discussed daily by the FMS B team. Residents and faculty can take turns presenting informally (group discussion of an article or presentation). Most of these topics are available as articles in the FMS B notebook O2.121 (FMS office). ACOG Compendium is a good resource as well.

Week 1 :

- OB Basics-how to deliver, language, paperwork, EPIC
- Normal labor and delivery
- Newborn care
- L&D triage-r/o labor, infections
- Fetal monitoring

Week 2:

- Postpartum care including contraception
- Preterm labor
- Group B strep
- Induction
- Breastfeeding

Week 3:

- Shoulder dystocia
- Perineal repair
- Labor dystocia
- Vacuum extraction
- Postpartum hemorrhage

Week 4:

- Augmentation of labor
- FSE/AROM/amnioinfusion
- VBAC
- Preeclampsia
- Twins
