

## OB Procedure Documentation (**REQUIRED** by RRC and our residency program)

- Be sure to document your OB procedures on New Innovations:
  - Vacuum Extraction
  - Amnioinfusion
  - Manual Removal of Placenta
  - Episiotomy/Perineal Laceration Repair
  - Pudendal Block

- Please document **all deliveries** on New Innovations using the following options:

**NSVD Primary Patient** (you delivered your primary patient...you are the birth attendant)

**NSVD on call delivery** (you are the birth attendant when on call for FMS)

**NSVD supervision** (you are the senior resident supervising FMS or primary patient delivery)

**Primary Patient pre/post delivery care** (you manage your patient to the point of c-section or forceps, i.e. you are in hospital managing your patient and OB does the delivery)

**Delivery of Twins**

**C-Section-First Assist**

➤ **Requirements:**

A minimum of 50 total deliveries (at least 10 need to be primary OB's deliveries) during three - year residency program

- Primary OB deliveries:** You can count a delivery as a Primary OB delivery **if you were at the perineum delivering the baby or if you managed the patient up to the point of c-section** (continue to follow your patient to insure continuity of care)
- FMS deliveries:** count if you are birth attendant (NSVD on call delivery) or supervising resident (NSVD supervision)
- Be sure preceptor lets you know if you are Independent, Progressing or Dependent** with each procedure and document on New Innovations.
