DEPARTMENT CHAIR - 2015-2016 IN REVIEW

Our community involvement has substantially increased with the hiring of additional physicians and advance practice providers (APPs) to augment the care provided in the HCMC network of neighborhood clinics. We now have a total of 74 MD and APP providers working within the department at 6 clinics scattered throughout metro Hennepin County.

Within the Family Medicine Residency Program, we said goodbye our PCBH psychologist James Anderson, PhD, and hello to Marchion Hinton, PhD. All of our Core Teaching Faculty have completed the U of MN Faculty Development Fellowship and several Faculty members and residents presented at the National STFM meeting held in Minneapolis in May. Chandra Cherukuri will be starting as a teaching faculty member in early August. Chandra is a 2014 graduate of the HCMC FM Residency program and has spent the last two years in geriatric and sleep fellowships. Our residency program recruitment has been successful yet again and a full complement of residents started their training this past June.

At Whittier Clinic, the APT program has completed its move to Whittier from East Lake Clinic to be closer to their patient base and more actively involve residents in the unique care model it provides. We continue to expand the services we provide to our patients. Cardiology, General Surgery, OB-GYN, Chiropractic, Acupuncture, Podiatry, Psychology, Pediatrics, Lactation Education and Hand Therapy all have a presence at Whittier. We model ourselves as a place where our patients can obtain as many of their health care services as possible. This is only possible through the generous support of the HCMC departments that send specialty care providers to practice here.

I would like to thank all that have made the past year an exciting one, as we say goodbye to old friends and hello to new ones. We look forward to the coming year, as we offer outstanding services to our patients, a rewarding education to our residents and interesting challenges to our providers.

Jerry Potts, MD

Jerry Potts, MD,
Chief, Department of Family Medicine
Hennepin County Medical Center

LETTER FROM THE PROGRAM DIRECTOR

I am pleased to share with you the Annual Report of the Department of Family Medicine at Hennepin County Medical Center. The report is a summary of our activities and accomplishments from July 1, 2015 to June 30, 2016. We are pleased to continue to build on our reputation of excellent clinical training, community involvement and advocacy, quality and safety training and developing leaders for Family Medicine.

Our residents have the privilege of providing comprehensive care for the most vulnerable of our patients at Whittier Clinic, a certified Minnesota Health Care Home. There they participate in creating a culture of health for all patients in their care. They participate in LEAN based Quality Improvement methodologies; provide population care through their use of patient registries; participate in a group model of care in Centering Pregnancy and work with interdisciplinary teams in complex care clinics for adults and adolescents. This year our educational development focused on implementing structured curricula in these areas.

Our PGY3 residents continued to work with underserved populations both locally and internationally with groups of residents travelling to the Philippines, Thailand and Tanzania. Residents developed confidence in putting their many skills as family doctors to work in these resource poor areas. Each returned with a renewed dedication to their specialty and a commitment to bettering health care for people everywhere.

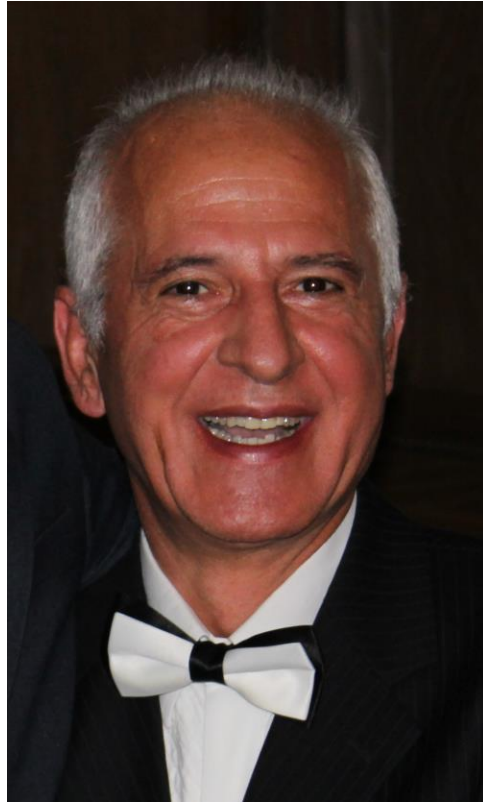

Both our residents and faculty participated in the Society of Family Medicine's Annual Educational Conference which was held in Minneapolis in May of this year. 7 residents presented posters and 11 faculty presented scholarly roundtables, research seminars, lecture discussions or posters. The residency program also sponsored the Fun Run (also known as the Marathonaki) which was held in downtown Minneapolis and scenic Loring Park.

At the end of the academic year, the HCMC Family Medicine and Whittier family were deeply saddened by the sudden death of our beloved Dr Masha Hemmati. He was a core faculty member who worked with residents in the nursing home, the clinic and in the hospital -both on the Family Medicine Service and on Labor and Delivery. Dr Hemmati will forever be remembered for his work ethic, his humor; his dedication to the profession of medicine; his courage in the face of adversity and his advocacy for his residents. Most of all, he is remembered for his fierce commitment to his beloved wife and son. In his own words. "To Allah we belong and to him we return." Rest well dear friend and colleague.

Allyson Brotherson, MD

Residency Program Director
Hennepin County Medical Center

IN MEMORIAM

**Dedicated to our beloved Dr. Masha Hemmati
1955-2016**

Dr. Mashallah Hemmati was a Family Physician here at HCMC, joining the department as a resident in 2001. After graduating from the residency program in 2004, he worked at Richfield Clinic and later moved to FMC and Whittier. While maintaining a busy primary care practice, he also took an active role in teaching residents at the hospital, at a local Nursing Home, and in the clinic, with special expertise in minor surgery and urologic issues. Dr Hemmati died of natural causes in June 2016. He is survived by his beloved wife Miriam and his son, Pouja.

What we have done for ourselves alone dies with us, what we have done for others and the world remains..... immortal. *Albert Pike*

VISION AND MISSION STATEMENT

DEPARTMENT OF FAMILY AND COMMUNITY MEDICINE HENNEPIN COUNTY MEDICAL CENTER

The Department of Family Medicine strives to be an educational center of excellence for family physicians who are competent in caring for people of diverse cultures, committed to serving their community, and capable of practicing in a wide variety of settings.

The mission of the Department of Family Medicine is to educate Family Physicians to become leaders in Family Medicine and Community Health, and to serve our diverse urban community.

Our values guide and inspire us to do our best as we provide care and medical education. These values include:

- 1. Excellence in Medical Care. We provide care that is based on the best medical knowledge and evidence.**
- 2. Dignity and compassion. We create a community of healing to care for our patients and nourish our coworkers.**
- 3. Whole person. We promote health and healing that addresses body, mind, spirit, family and community.**
- 4. Cultural Respect. We provide care that is responsive to people's unique cultural characteristics such as race, ethnicity, national origin, language, gender, age, religion, sexual orientation, and physical disability.**
- 5. Health of All. We value healthy people, families, and communities. We work to optimize the health of all people and to eliminate health disparities.**
- 6. Physician Wellness. We embrace healthy living for ourselves.**

PROGRAM EDUCATIONAL GOALS AND PHILOSOPHY

Patient Care Skills

Graduates must be able to collaborate effectively to provide patient care that is compassionate, appropriate and effective both for the treatment of health problems and the promotion of health and wellness.

Our graduates will:

- **Promote health and healing that address body, mind, spirit, family and community**
- **Provide comprehensive patient focused care that embraces family and community input**
- **Promote health by using effective methods of patient education both in the physician relationship and within the health system**
- **Prevent disease and lessen its morbidity and mortality by using proven primary and secondary prevention techniques**
- **Recognize patient's psychosocial needs and provide appropriate assistance**

Medical Knowledge

Graduates will know and apply current best practice guidelines for the diagnosis and management of common inpatient and outpatient problems. Graduates will:

- **Diagnose and manage most acute and chronic health problems using current clinical and best practice guidelines**
- **Choose among various treatment options by knowing and examining the scientific evidence that supports them**
- **Demonstrate adequate knowledge to pass the Family medicine specialty boards**

Interpersonal and Communication skills

Graduates will demonstrate the skills and attitudes that allow effective interaction both oral and written, with patients, families and all members of the health team.

Graduates will:

- **Demonstrate empathy and respect**
- **Engage faculty, peers or other health care team providers appropriately to elicit and clarify information**
- **Transmit medical information appropriately to health professionals, patients and their family members**

Professionalism

Graduates will demonstrate the knowledge, behaviors and attitudes necessary to promote the best interest of patients, society and the medical profession. Graduates will:

- **Conduct professional activities in an ethical and legally responsible manner**

- **Provide care that is responsive to the patient's unique cultural characteristics**
- **Devote attention to the quality of personal and family life in order to sustain healthy relationships with patients and other health professionals**
- **Be prepared to provide leadership in the medical communities in which they serve**

Practice- based learning

Graduates will have knowledge, skills and attitudes necessary to evaluate and improve their method of practice and implement techniques to improve their patient care. Graduates will:

- **Use practice improvement techniques, evidence based medicine and information technology to improve patient care**
- **Demonstrate ability to teach and model appropriate patient care, to others on the health care team**
- **Develop skills and habits of lifelong learning**

Systems- Based Learning

Graduates will demonstrate the knowledge, behaviors and attitudes necessary to provide high quality care for patients within the context of the larger healthcare system. Graduates will:

- **Understand the nature of system errors and strategies to minimize them**
- **Understand health care financing and its impact on the quality and availability of patient care.**
- **Appreciate the role of all members of interdisciplinary medical teams and their use in maximizing patient care.**

RESIDENCY PROGRAM HIGHLIGHTS

FACULTY

Our tireless faculty are the true heroes of this residency program. They are a dedicated group who do more and more with shrinking resources. They continue to provide exceptional service in a climate of stringent duty hours and increasing demands as core faculty.

Marchion Hinton PhD is Co Director of Behavioral Medicine and is the new addition to the Faculty in 2015-2016

STFM Annual Educational conference Research and Scholarly Activity

Many of our faculty continue to provide mentorship for residents in the area of research and scholarly work. The in Minneapolis this year and many of our residents took advantage of the opportunity to display scholarly work and posters.

Residents presenting at STFM were :

PGY3: Tolulope Abikoye; Rishi Ramdass; Michael Ngo; Avninder Mann; Esegene Abokede

PGY2 participants were Ese Aghenta and Mahveen Ethezaz

Faculty presenters were Veronica Svetaz, Michelle Karsten, Uche Nwaononwu, Tsewang Ngodup, Susan Hasti, Lourdes Pira, Praveen Tupakula, Nancy Newman, Allyson Brotherson

The Marathonaki

Our residency program had the honor of sponsoring the Annual Marathonaki put on by STFM every year. The run/walk was held on Tuesday from the Hilton Minneapolis from Nicollet to Loring and back through the Sculpture garden. Warmest congratulations to the residents and faculty who organized and participated in the glorious event held on a picture perfect spring morning. Kudos to: Jarrod Yamanaka, Jon Koretkoff, Charles Anderson, Nancy Newman, Michelle Karsten and Maria Kaefer.

RECRUITMENT:

Recruitment was a high priority again for the academic year. Sustaining program quality and obtaining successful program outcomes depends in part on the quality of our residents. The Recruitment committee maintained the same goals for the 2015-2016 applicant season:

- recruit highly qualified applicants,
- increase the % of US grads,
- restore the gender balance (has been weighted toward male),
- increase the number of residents who remain to practice in Minnesota,
- and maintain racial and ethnic diversity in our program as befits our diverse patient population

Outcomes:

33% of the class of 2019

Class of 2016 - -3 (27%) took jobs in Minnesota

100% boards pass rate since 2013

Classes of 2016, 2017, 2018 and 2019 are all racially and ethnically diverse

42 % of the interns who entered in 2016 are graduates from US allopathic or osteopathic schools

The recruitment Committee led by Dr. Susan Hasti will continue its effort to recruit the candidates who “best fit” our mission, vision and goals. Recruitment efforts are focused at the National Conference held in Kansas City every year and the Family Medicine Midwest Conference.

CURRICULUM HIGHLIGHTS

Centering pregnancy curriculum

Starting in the spring of 2013, residents participated in the existing Centering Pregnancy groups. PGY2 residents are assigned to each centering group. In the upcoming academic year the Centering pregnancy faculty will deploy a curriculum that prepares residents for skills that they need to facilitate and implement group visits based on the Centering model. Faculty leaders are Michelle Karsten and Susan Hasti.

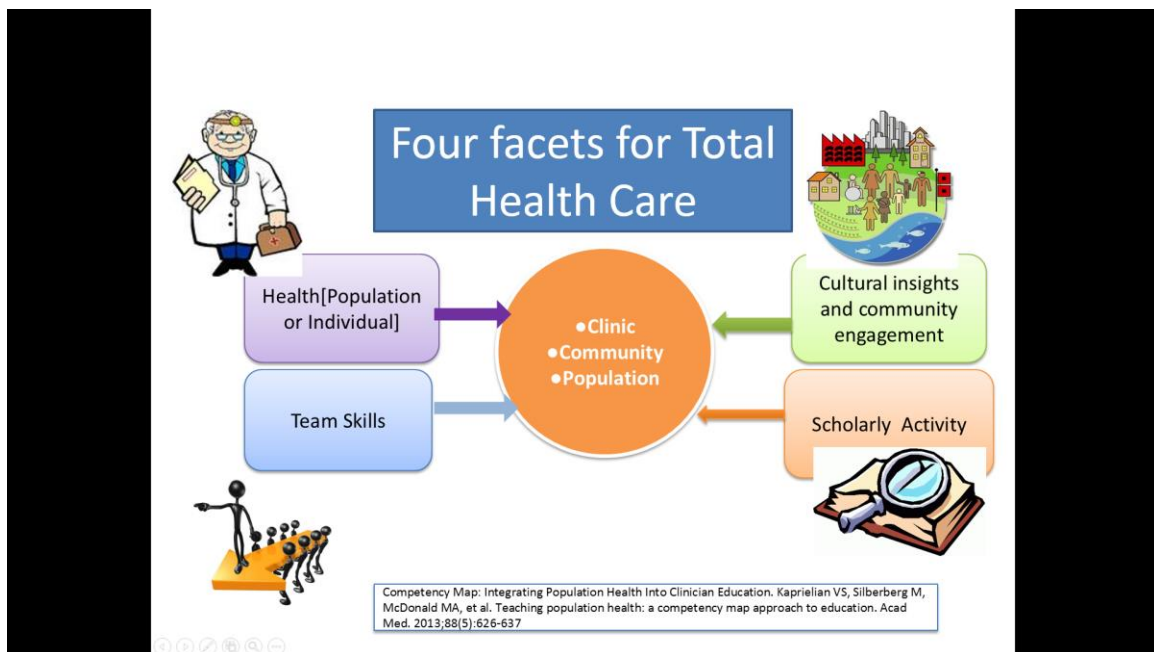

RESIDENT TRAINING AND EVALUATION IN THE SIMULATION CENTER –

We had our first simulation Chief this year. Ben Krage One of the Chief residents together with Drs Michelle Karsten and Kim Petersen developed a unique curriculum for Family medicine Residents to be deployed in the Simulation center. Residents have Sim training every time there is a 5th Wednesday in the month. Our faculty serve as their preceptors with help from the Educational team in the HCMC Sim Center .

Resident and faculty in the Simulation Center – learning about foot ulcers in a diabetic

POPULATION HEALTH

The Community and Population Health Education Committee was formed this academic year and has been hard at work creating a population health framework that spans the three training years of residency. The curriculum prepares residents to provide total health care for all patients whether they are seen in the clinic- the Patient Centered Medical home; the community in the Community Centered Neighborhood or whether they are part of the global population. Four themes are embedded in each rotation that informs population and Community health. They are Health; Patient Centered Centeredness, Team skills, Scholarly projects.

Health Equity Leadership

Third year residents participate in a capstone curriculum called Baraza. As part of the Leadership Curriculum, the class has been learning about Advocacy as a tool to empower our communities and stimulate changes in policies and laws to benefit underserved population. Advocacy is empathy at work. Residents together with Dr Svetaz supported the Hennepin County Policy Department in a bill to provide preventative care services to undocumented minors. Residents visited the legislature to lobby members of both houses to support the bill.

DAY AT THE LEGISLATURE

International Medicine rotations

Many physicians are interested in providing medical care to people of other countries and other cultures. The HCMC Residency program is committed to creating opportunities for international experiences for interested residents and faculty to serve in resource poor, underserved areas of the world. Our ONE WORLD, ONE HEALTH perspective seeks to create a passion in our residents for service in underserved areas through medical missions. Through these medical missions, our hope is that we engender in our residents a responsibility for the health of people not only in our neighborhoods, but the health of all underserved. Ingrid Wong and Trevor Chan anticipate an extraordinary opportunity in the Philippines, and Suchithra Narayan is planning a rotation in Chang Mai, Thailand.

International Training Sites

Bataan Mission, Philippines

*Chang Mai Family Medicine Clinic
Chang Mai, Thailand

Medical Mission for
Mariveles
Bataan Mission,
Philippines

Ingrid and Trevor Chan and Natalie Hayes in the Philippines

The international rotation was remarkable because it incorporated something that we had always wanted to do. To give back to the underserved was not only a privilege but also an unique educational experience in a third world country where there is a lack of medical care. We were able to utilize our practical, broad based family medicine skills to not only educate patients and better their health, but also utilize our procedural skills to provide in a sense, a cure to ailments that disfigured the patients. *Ingrid Wong PGY3*

Rishi Ramdass and patients in Ilula Hospital and Nursing School, Ilula Tanzania

My experience in Tanzania has made me a more compassionate and caring physician
Rishi Ramdass, PGY3

[Suchi Narayan in Chang Mai Family Medicine Clinic in Chang Mai, Thailand.](#)

I learned that single doctor with a lot of grit and determination can make a world of difference *Suchithra Narayan*

OTHER NEWS

[MDH grant funding to increase physician primary care workforce](#)

The HCMC Family Medicine residency program received funding from the Minnesota Department of Health to increase the size of the resident class. The money received will fund the training of two residents who entered in 2016 and will graduate in 2019. The grant is an incentive to address the projected deficit of Primary care physicians in Minnesota.

CENTER FOR HEALTH EQUITY LEADERSHIP (CHEL)

The Center is a joint effort among APT, the Department of Family and Community Medicine, and the Family Medicine Residency Program. The Center, which resides in the Department of Family Medicine at Hennepin County Medical Center, has as its core the achievement of the APT (“Here for You”) Program, a model program of integrative care.

CHEL accomplishments

- Created, with a team of 3rd year Family Medicine Residents and Public Health Students, a White Paper on Equity, used to support 2016 HCMC’s advocacy efforts to expand Preventive Care access to undocumented families living in MN.
- Prepared a one day Policy Summit, where residents lived advocacy, talking and sharing that White paper on Equity with MN Legislators.
- Worked with the State Legislature, testifying 3 times at our MN State Legislation, to pass Health Home model of care and reimbursement as a MN approved model, using APT results.
- Helped pass an amendment assuring that Health Home models are used intentionally to help to remove Health inequities in Minnesota .

APT accomplishments in 2015-2016

This year was marked by a great transformation at APT. The clinic was moved to Whittier Clinic to be:

- in closer contact with our residents,
- for our youth and families to have more access to services, and
- to bring more cultural concordance to the largest HCMC clinic serving Latino families.

2016 Society for Adolescent Health and Medicine (SAHM) Annual Conference,

- APT led a two day Conference in Family Centered Adolescent Care,
- presented 7 sessions at the National Conference of the largest National and International conference on Adolescent Health,

2016 Annual Educational Conference of Society of Teachers of Family Medicine (STFM)

- APT faculty and staff presented 8 sessions at the Society of Teachers on Family Medicine 2016 Annual Spring Conference.

APT was certified as one of the only two Primary Care Behavioral Homes in a pilot sponsored by the Department of Health Services(DHS). Together with CHEL, APT is starting a pipeline for Underserved Teens: “From Clinic to College Pipeline”,

where teens will team up with PG3 residents to be mentored in a healthcare pathway and to do together Community work.

APT has also published several articles, in Pediatrics, and Family Practice Management, among others.

Our Emerging Student and resident leaders in Class of 2017

Whittier Clinic High School Internship Project

Jarrod Yamanaka, M.D., second-year resident at Hennepin County Medical Center's Family Medicine Residency Program, will partner with FAIR School in Minneapolis to introduce high school students to careers in the medical profession. Jarrod and his team will give a tour of the clinic to high school students; work with students in the classroom as they learn about anatomy and physiology; and select one high school student for an in-depth summer internship to help enhance the connection between Whittier Clinic and its surrounding community. Jarrod's mentors are Kimberly Peterson, M.D. and Susan Haddow, M.D.

Rest and Renewal (R&R) Group Visits in an Underserved Population with Diabetes and Depression and/or Anxiety

Ese Aghenta, M.D., and Randolph Borrero, M.D., second year residents at Hennepin County Medical Center Family Medicine Residency Program, will lead a six-week course for three groups of female patients on Medicare with diabetes and a mental health diagnosis. Patients will learn therapies which address stress resilience, sleep optimization, low glycemic diet, healthy movement, mindfulness meditation, and connection to self and others. Mentor Kara Parker, M.D., will oversee Ese and Randolph's innovation project.

DISTINGUISHED ALUMNUS

Thomas H. Bracken M.D. - Minnesota Family Doctor of the year 2015

Year of Graduation: 1982

Why I came to HCMC: I chose HCMC because I knew I would be able to truly care for patients with a variety of conditions including acute trauma and serious illness; with most residents spending most of their time at HCMC there is an unusual level of support amongst residents of different specialties. I have been precepting at the HCMC Family Medicine Residency since 1984.

Influential moment and inspirational person: I had the privilege of having Dr. Harley Racer as a staff preceptor during residency and then teaching alongside him for another 25 years after graduation. He taught all of us to look beyond the disease to the entire person, and then beyond the person to the family, and even beyond that to the community. His spirit remains in the many faculty that follow his example at HCMC's Family Medicine Residency....

What I am proud of: I am proud to work at two institutions that value persons, at any level of employment or illness, more than economic goals or statistics; HCMC and Mille Lacs Health System.

Where I practice now: I am now VP of Medical Affairs, but mostly just a regular Family Physician, at Mille Lacs Health System in Onamia, Minnesota. We have managed to survive the difficulties of rural medicine and stay independent of the larger systems that are gobbling up many rural practices. We have grown from two clinics to five, and offer the full spectrum of Family Medicine to an over 400 square mile area.

What I do outside medicine: The best thing I do is enjoy my three grandkids, who are even more fun than my four daughters. I go twice a year to Haiti to help staff our Mille Lacs Health System rural health project, "Santo Clinic"; I am busy with music at our church; enjoy wilderness canoeing in Canada.

What is best about Minneapolis: Of course, my three grandkids. I also enjoy the jazz clubs, Guthrie Theater, and the fantastic restaurants on Eat Street right by Whittier Clinic.

OTHER ALUMNI NEWS

Congratulations to **Dr. Syed Askari (Graduating class 2001)** (pictured with his wife, Dr. Sabeen Askari) who was presented with an AAFP Degree of Fellow during the All-Member Celebration of the Minnesota Academy of FamilyPhysicians on April 14th.

Sabana Pathan MD CLASS OF 2011

I can't believe it has been 5 years since completion of residency, time flies. I am doing great here. I am currently at Duke Primary Care - Wavery Place in Cary, NC. It's alot of bread and butter primary care - DM, HTN, Lipids, Afib, CHF, CAD, gyn and pediatrics. I am also the only one who does procedures at the office so its fun. I do IUDs, Implanons, toenails, lacerations, I&Ds, joint injections. I also teach NP and PA students. It's truly amazing, how much I learned from our GREAT residency program. You and the rest of the staff should be very proud of having an excellent program, that makes you ready for success on Day 1 after completion of residency.

Sharath Reninguntula MD Class of 2014

My family is doing well. I would love to speak with the residents if I am back in Minneapolis. One of the aspects about Family Medicine and my training at HCMC was that I was able to work as 1. Primary care physician 2. Hospitalist 3. Now I'll be starting work as an ER physician as well. Which other specialty allows one to be able to work in such various positions? Of course, I could do OB as well, but I hope to never have to do another delivery.

Keith Spears MD Class of 2011

Since residency, I've served on my organization's depression and pharmacy committee and am currently on the ICSI depression committee. I'm currently the Chief of Professional services for our White Bear Lake clinic

FACULTY AWARDS AND RECOGNITION

2016 Harley Racer Medical Education Award winner

The 2016 Harley Racer Medical Education Award was given to Dr. Uche Nwaononiwu. The award is presented in the memory of Dr Harley Racer, past faculty of the residency program. Dr Racer was dedicated to the creation of family doctors of excellence. He inspired many of the faculty who were honored to work with him.

Dr Nwaononiwu was recognized for his dedication to research and scholarly activity and for his creation of an environment of inquiry in the residency. He is a graduate of this residency program and attended from 2009-2012

Silver Level Recognition

Dr Allyson Brotherson received a Silver Recognition Award from the Association of Family Medicine Residency Directors

The Resident's Choice Award 2016

Dr Ayham Moty received the 2016 Resident Choice Award. He was honored for his teaching ability, his leadership, his teaching ability and work ethic, enthusiasm and dedication to the residency program. Dr Moty is a past resident and graduated in 2006
